FOR THE GREEN PROFESSIONAL

Plantion
Connecting in flowers and plants

'Seeing, feeling and smelling the products'

Plantion is the most complete and customer-oriented buying centre for florists, garden centre owners and all other green professionals in the floriculture industry. You decide how and when you buy: at our centre in Ede or 24/7 via the webshop. Discover the many extras and offers for our Plantion customers.

CLOCK ALWAYS FRESH FOR THE BEST PRICE!

The clock is still the heart of our business: it allows you to see, feel and smell the fresh supply five mornings a week. In addition to the more familiar flowers and plants, smaller, often very surprising varieties are also offered. Our supply is as sustainable as possible and thanks to the auction system, you will

always buy fresh produce at a fair price. Buy on the clock in the new auction room with a razor-sharp LED screen, or easily with a laptop from your own office. The inspiration you find in the buying centre, the convenience of shopping online, or a combination of both? The choice is yours!

CLOCK PRESALE:

You can choose from tomorrow's clock offers, for a fixed price, one day in advance.

Buy five mornings a week in the auction room through the auction system. This way you can truly experience the products by looking at, feeling and smelling them.
